

Medical services in Gladstone advance thanks to Avion Centre.

Gladstone locals will have access to state-of-the-art X-ray and ultrasound medical imaging technology when the new Avion Centre complex opens its doors in August.

Experienced Radiographer/Sonographer, Petra Byrne, moved quickly to sign a deal on 69sqm of space in the recently approved medical centre, which will be located on level 1 of the exciting new commercial development, currently under construction on Shaw Street in New Auckland.

With 23 years in the Radiology field and having lived and worked in Gladstone for the last 6 years, Ms Byrne is excited by the opportunities Avion Centre will provide for the local medical community.

“I am looking forward to the opportunity of responding to the medical imaging needs of Gladstone and the surrounding communities as it grows into the future.”

Avion Centre, developed by reputable residential and commercial property development group, Merranda Pty Ltd, will serve over 1200 homes in the New Auckland area, as well as the greater Gladstone region due to its convenient access to the Dawson Highway.

Developer Mark Dindas is excited at the prospect of offering professional, specialised medical services to the local Gladstone community, to answer the growing need of the still booming area.

“With the population of Gladstone and surrounding region growing at such a rapid rate, it’s important for medical and other commercial services to be readily accessible to the public. Particularly with major industry projects like the now completed RG Tanna Coal Terminal and the Rio Tinto Alumina Refinery now underway & with many other projects planned, the population is just going to skyrocket and we need to be prepared for that.”

With public transport at its door, a well established childcare centre, school and retirement village all located within a short walking distance, and ample car parking and lift facilities available for easy customer and patient access, Avion Centre is in a very opportune position to serve the medical needs of the Gladstone community.

There are limited spaces still available in the level 1 medical centre, with suites available from 30-150sqm. Specialist and general medical practitioners, as well as diagnostic service providers, are invited to inspect the medical centre plan prior to July 30, to secure adequate practice space.
